

THE GENESEE BREWING COMPANY, INC.
LIEBOTSCHANER BEER

Post-Prohibition 40' Composite Refrigerator Car

The Genesee Brewing Company traces its history back to 1857, when its predecessor Rau and Reisky Brewery was established in Rochester, New York. That brewery became Reisky & Spies in 1879 and was subsequently purchased and renamed the Genesee Brewery. In 1932, after the repeal of Prohibition, the brewery was reopened as The Genesee Brewing Company, Inc. Noted for its different types and styles of beer and its distinctive "red ball" logos, one of the company's most popular post-Prohibition brews was its German-style Liebotschaner. Our newest version of the traditional Genesee Brewing Co. refrigerator car features the company's prototypical paint scheme and the distinctive Liebotschaner Beer logo. Please note: this limited production run will only be available in a single road number.
