NICKEL PLATE WAR EMERGENCY CABOOSES- O SCALE 1:48

Nickel Plate Road War Emergency cabooses have been manufactured in beautiful brass by Ajin and imported exclusively for Nickel Plate Models by Overland. Use this form to order. Although not yet advertised, only 46 of these unique models remain. If you want more or know someone who does, now is the time to get them. The High Speed Service Scheme is factory-painted in six different numbers. Numbers available (first come, first served) are 1362, 1359, 1354, 1351, 1347 and 1343. The older Oxide Red paint scheme will be done by our custom painter using baked scalecoat paint, custom, hard to detect decals, then clear-coated. The models will be shipped, unpainted, from us to the custom painter we use and shipped from him to you. We have been promised 30 day delivery. Note that, because of the painting arrangement, you will not receive your cabooses lettered in the older scheme for approximately six weeks after you send us your money. You will receive a separate acknowledgment of the shipment of the model. Factory-painted and unpainted models are shipped following receipt of your check. The model is offered with correct trucks in both standard ("O5W") and, for only \$10.00 more, in proto-48. A few extra trucks and parts are available, first-come, first served, with customers purchasing cabooses given first priority. Here is your form to complete your order. You may also use this form to order additional cabooses as well as trucks and parts: Enter Amount:
